IT Solutions for Home & Business

## Computer Repair Training Courses

### Gain real, practical skills...

Built upon over 10 years experience maintaining and repairing PC's Manor Solutions offers a range of training options designed to provide you with the necessary practical skills to confidently and accurately diagnose and repair a wide range of computer faults.

Our courses also cover a wide range of practical skills that are often lacking in other courses such as diagnosis of hardware faults and corresponding repair techniques along with providing trainees in-depth knowledge of how to tackle software problems including malware and virus infections, registry and software corruptions and more.

### Hands on training...

We offer hands on, practical training that will give you not just the knowledge of how and why problems occur but also gives you the chance to 'get your hands dirty' and actually fix the problem yourself, giving you the confidence to apply what you learn.
